

IoT WEEK 2019
17. - 21. JUNE
AARHUS · DENMARK

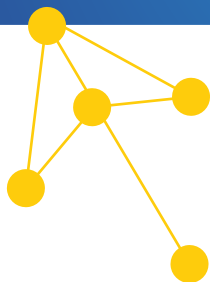

LET'S CONNECT INTERNET OF THINGS AARHUS 2019

The number of IoT devices, IoT data and its impact explode exponentially these years. IoT is already massively affecting our everyday lives, our private and business related decisions and the society we live in. Whether we like it or not, there is no doubt that IoT will affect us all even more in the future.

All of this is however just a way to reach a higher goal. On a large scale, using data from IoT devices help us all fulfil UN's Sustainable Development Goals. On a smaller scale, data is for example used to locate and monitor a patient's health while he or she is hospitalized waiting for an operation.

Our goal is to continually challenge status quo and the use, benefit and value added and created by IoT in everyday life. We aim to inspire companies' and individuals' use of IoT devices in a way that enable them to reach higher.

**SAVE THE DATES!
17. - 21. JUNE 2019**

**LET'S
CONNECT**

Are you interested in IoT? And more specifically the value that IoT could create for you or your company?

INTERNET OF THINGS

AARHUS 2019

No matter your interests, you should participate in IoT Week 2019 in Aarhus, Denmark because you are going to:

- ▶ Get updated on the latest trends and findings
- ▶ Get inspired by use cases from all over the world
- ▶ Meet IoT experts and decision makers

We believe that IoT will affect everything around you - so even if you're not (yet) interested in IoT, you should visit IoT Week 2019 in the beautiful city of Aarhus to get inspired.

Together we can embrace and affect a future based on The Internet of Things.

Local host - IoT Week 2019

It-forum is the local host and is responsible for IoT Week 2019.

It-forum is a non-profit networking organization representing almost 500 companies - all with one common goal: Efficient use of Information and Communication Technology and the opportunities that follow along.
